Composition exterior fabric: 100% cotton twill.
Filling: 100% polyester, siliconized and conjugated hollow fiber.
Filling density: 500, 600, 800, 1.100 grs/m².
Confection: 4 elastic corner fittings.
5cm in height with 4cm baffle boxes, finished with piping.
Color: White.

Feather-Duvet

Composition exterior fabric: 100% cotton twill.
Filling: 95% small duck feathers 30/40 mm and 5% duck down.
Filling density: 1.900 grs/m².
Confection: 4 elastic corner fittings.
5cm in height with 4cm baffle boxes, finished with piping.
Color: White.

Viscoelastic 1,5 cm

Composition exterior fabric: 100% polyester.
Composition middle layer filling: 1´5 cm, 100% memory foam (viscoelastic polyurethane) 50 kg/m³.
Composition lower fabric: 100% cotton.
Confection: 4 elastic corner fittings.
Quilted with a button pattern and with an edge seal.
Color: White.

Viscoelastic 3 cm

Composition exterior fabric: 100% polyester.
Composition upper layer filling: 1´5 cm, 100% memory foam (viscoelastic polyurethane) 50 kg/m³
Composition middle layer filling: 100% memory foam (viscoelastic polyurethane) super soft 2 cm, 40 kg/m³.
Composition lower fabric: 100% cotton.
Confection: 4 elastic corner fittings.
Quilted with a button pattern and with an edge seal.
Color: White.

Viscoelastic 5 cm

Composition exterior fabric: 100% polyester Strech.
Filling: 5 cm, 100% memory foam (viscoelastic polyurethane) density 40 kgs/m³.
Composition lower fabric: 100% polyester Strech.
Confection: With zip and 4 elastic corner fittings.
Color: White.

Topper cover Raso

Composition: 100% sanforized cotton.
Confection: 4 elastic corner fittings.
Corners with safety stitching.
Color: White.

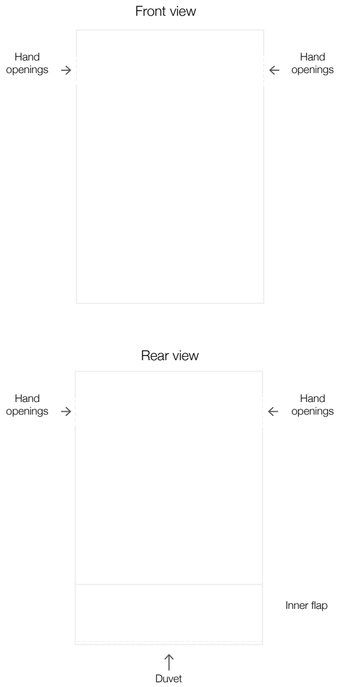
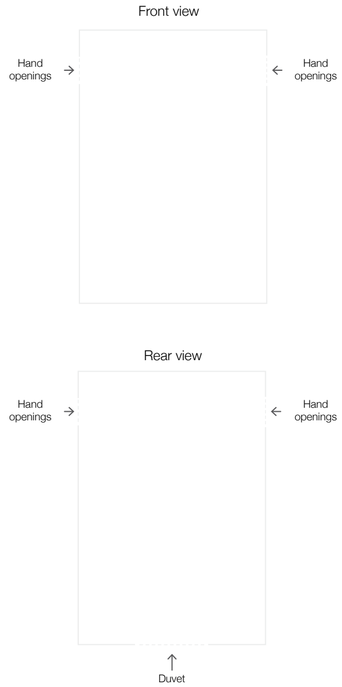
Basic duvet cover

Complete cover, with an inner 40 cm flap and 15 cm lateral openings at the top (hand openings).



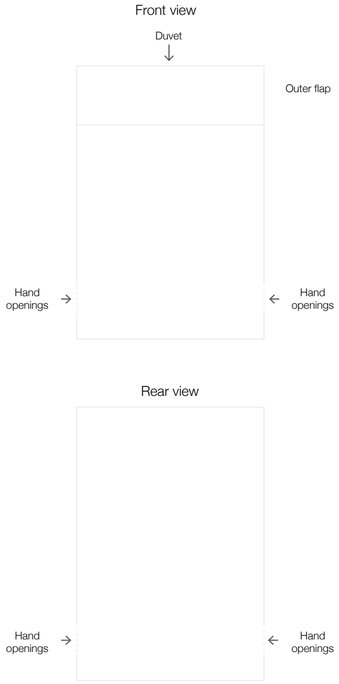
Sack-type duvet cover with narrowed opening

Complete cover with no flap (sack type) and 15 cm lateral openings at the top (hand openings)



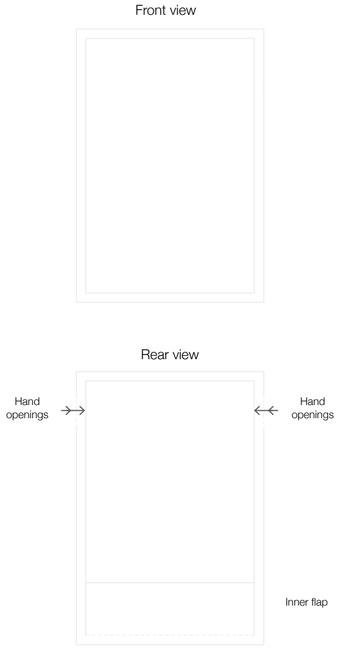
Reverse duvet cover

Complete cover, with an outer 40 cm (to fold over as if it was a top sheet) and 15 cm lateral openings at the top (hand openings).



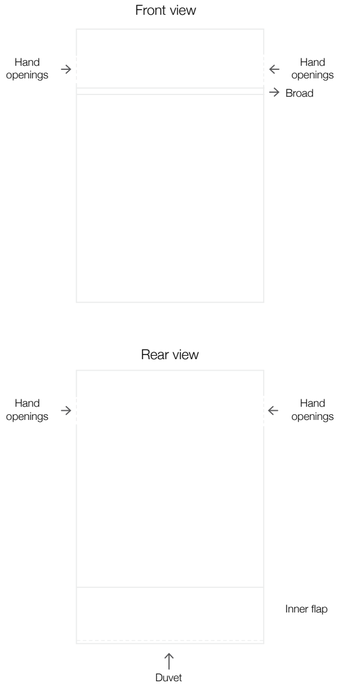
Duvet cover with ruffle

Complete cover with an inner 40 cm flap, 5 cm ruffle and 15 cm lateral openings at the top.



Duvet cover with top-sheet effect

Complete cover with an inner 40 cm flap, 15 cm lateral openings at the top (hand openings) and a broad 5 cm hem.



“Sandwich” bed

This is a special and practical way of assembling the bed, in which different elements are involved: on top of the fitted sheet, we put a top sheet, a duvet and another top sheet. The top part of the first top sheet is used to ‘wrap’ the rest of the items, creating an elegant bed with the practicality of having a duvet without its respective cover.

Decorative elements

Carmela Martí's decorative textiles are the perfect element to finish off the bed. To the comfort and warmth of the sheets, we add a touch of color and texture with bedskirts, plaids and cushions.

We have a wide variety of colors in each of the fabrics and we adapt to the measurements of each bed.

CERTIFICATES

STeP by Oeko-Tex®

The Sustainable Textile Production (STeP) certificate is audited and issued by the International Oeko-Tex® Association. It certifies sustainable production through the implementation of processes that respect the environment, health and safety, as well as guaranteeing optimal working conditions. It covers all stages of the production process, from spinning to manufacturing, giving Resuinsa the highest level of sustainable production. Through STeP by Oeko-Tex®, we offer our customers official reports on the carbon and water footprint of our production process.

Oeko-Tex® Standard 100

Since 1998, we have annually renewed the Oeko-Tex® Standard 100 Certificate, a global system of independent testing and verification that guarantees that our textile products, in contact with the skin, are free of substances that are toxic to the health of the user.

GOTS (Global Organic Textile Standard)

GOTS is the world's leading standard for the processing of textiles made from organic fibers. It includes ecological and social criteria supported by independent certifications throughout the entire textile manufacturing chain. It certifies that the cotton used originates from organic agriculture.

FAIRTRADE®

The FAIRTRADE® label guarantees that our products comply with fair trade standards, fighting poverty, inequality, injustice, protecting the environment and combating climate change.

RDI

HOTEL CIRCULAR ECONOMY

In view of the European Directive EU 2018/851, which requires the collection and management of textile waste from 2025, Resuinsa has developed an R&D&I project in collaboration with the CDTI - Centre for Technological Development and Innovation.

This project makes it easier for hotels to manage textile waste, reincorporating it into the value chain and promoting a 100% hotel circular economy.

We offer innovative and sustainable solutions that benefit both our environment and our customers, moving towards a more sustainable future for society as a whole.

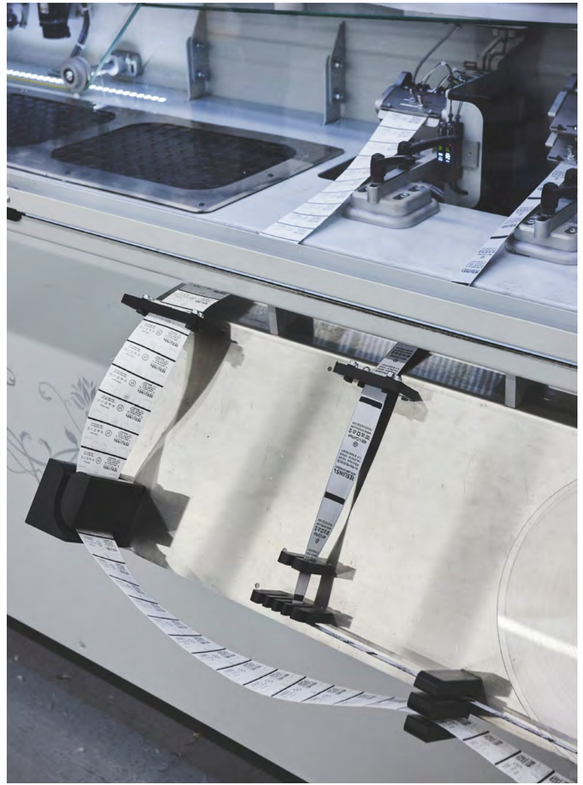
SMART TEXTILES

The management of smart textiles through the cloud is a reality. We have our own software, RESUINSA CLOUD, which offers our customers a cloud-based solution for the RFID technology incorporated in the garments and is fully compatible with any other management software used.

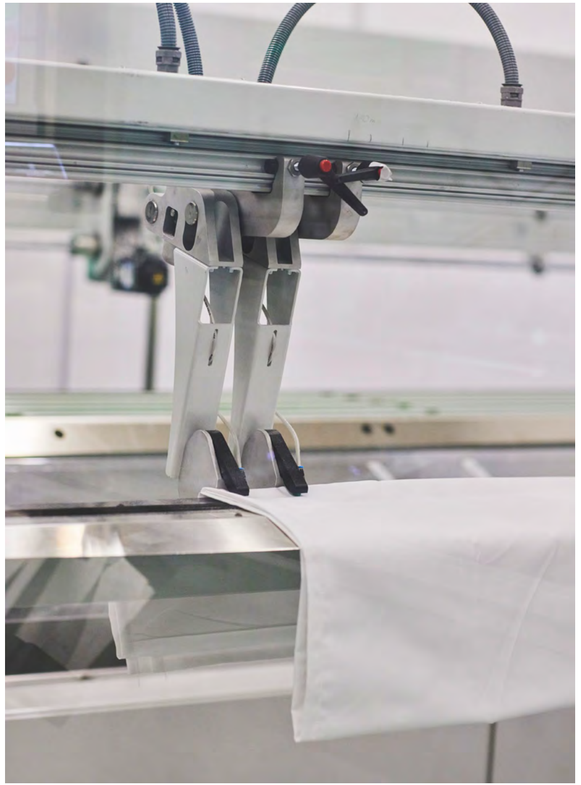
The garments are assigned from Resuinsa's facilities, directly to the customer, who receives specific training on the use of the platform. By means of a tag-tag, RFID technology facilitates the management of the traceability of articles in inventory processes, location, knowledge of their useful life, collection, distribution and internal washing processes. All this data is stored in an orderly fashion in the Resuinsa Cloud so that it can be accessed directly at any time and from anywhere.



TEXTILES SUITABLE FOR INDUSTRIAL WASHING

Textiles that are subjected to industrial laundering must be highly resistant and be able to maintain their qualities over time. The washing process involves many aggressive factors for the garment, such as the detergents and chemicals used in the process, the washing temperature, drying, calendering and pressing, among others.

In order to guarantee the resistance of the fabric, Resuinsa has a quality certificate for textile products suitable for industrial washing, which guarantees criteria such as resistance to traction, lamellar mass, absorption capacity, degree of whiteness and degree of polymerization (DP). It is the first company in the world to obtain it, anticipating the needs of the sector and placing itself at the forefront in terms of R&D&I in textiles.



CSR

At Resuinsa, our Corporate Social Responsibility (CSR) strategy is aligned with the United Nations **Sustainable Development Goals (SDGs)**, adopted in the 2030 Agenda.

We consider CSR to be a comprehensive commitment to society and the environment, based on a responsible business model that seeks to contribute to a fairer and more equitable society.

We are firmly committed to a **sustainable planet**, integrating environmental care in all our production processes and in all areas of the company. Since 2010, our boxes have been made from recycled materials and are fully recyclable. In 2019, we reinforced our environmental commitment by reducing the use of plastics by 60% through the modification of our packaging system.

As of 2020, we are part of the **United Nations Global Compact**, the world's largest corporate sustainability initiative with more than 12,500 entities in over 160 countries. Our dedication and commitment allow us to innovate and lead projects that generate value in society, promoting a more responsible and sustainable world.
